Report :

The NSS unit of Christian College of Engineering and Technology Bhilai conducted a tree planting and cleanliness drive on 02/10/2022, at the CCET Bhilai campus. More than 40 students and faculty members participated in the event.

Tree planting is recognized as one of the most engaging, environmentally-friendly activities that people can participate in to help the planet when done properly. Trees provide numerous long-term and short-term benefits. They not only look nice, but they also remove and store carbon from the atmosphere, slow heavy rain and thus reduce the risk of flooding, improve air quality, and reduce the urban heat island effect by reflecting sunlight and providing shade. Let us take a look at the long and short essay on tree plantation.

Cleaning is regarded as second only to godliness. On October 2, 2014, the Indian government announced a mission to make India clean by attempting to eradicate open defecation, improving solid waste management, and helping people understand the value of cleanliness. This initiative was inspired by Mahatma Gandhi's vision of eliminating all dirt and impurities that afflicted our nation and its citizens.

The Swachh Bharat Mission or Clean India Movement is commonly referred to as this initiative. Cleaning up all Indian cities and towns was the goal of this effort. Across the country, all towns—rural and
