Stakeholder's Feedback Report

Feedback process

One important process is curriculum design and development, which involves creating specialized educational materials based on needs that have been identified. With the ultimate goal of improving educational quality, this process incorporates stakeholder feedback and expert group collaboration. An organization that understands the importance of this process is the CCET, which set up a system for getting input from different stakeholders in addition to guaranteeing the creation of need-based inputs.

Involving stakeholders, such as students, instructors, and other pertinent parties, is essential to improving institutional procedures linked to curricula. Since their viewpoints offer important insights into the efficacy of teaching, learning, assessment techniques, and general capacity building initiatives, CCET actively seeks out and incorporates input from these groups. Through stakeholder engagement, CCET creates a cooperative atmosphere that encourages ongoing development.

Feedback from stakeholders is a useful tool for implementing improvements in a variety of educational fields. Knowledge gained from this feedback system helps make well-informed decisions, which improves instructional strategies, course materials, assessment

methods, and institutional tactics as a whole. Aligning educational provisions with learners' changing needs and the larger educational landscape is the main goal.

Curriculum must be regularly and consistently evaluated since it is a fundamental part of the teaching and learning paradigm. CCET's dedication to this idea is demonstrated by its focus on continuous evaluation and curriculum component modification. Through an iterative evaluation process, the curriculum is kept current, efficient, and sensitive to changes in society, technology, and educational dynamics.

In conclusion, curriculum design and development are the cornerstones of educational progress, strengthened by stakeholder input and engagement. CCET is a prime example of a comprehensive strategy for promoting educational excellence because of its commitment to integrating diverse viewpoints and its steadfast approach to curriculum evaluation. In addition to fostering an educational ecosystem that supports creativity, adaptability, and expansion, CCET's initiatives help to improve teaching and learning over time.

Prayer: Aim High, We Praise The Master

A vital component of preserving the calibre and applicability of educational programs is the curriculum development and feedback gathering process. This procedure is well-organized at CCET. It includes active involvement from a range of stakeholders to guarantee a thorough assessment and improvement of the curriculum.

At the end of each term, which usually happens in April and November of the academic year, the input on curricula and syllabi is methodically gathered. This schedule makes it possible for frequent evaluations and modifications, guaranteeing that the curriculum stays in line with students' changing needs as well as industry and job placement requirements. The curriculum investigation takes a comprehensive approach, taking into accounts both the overall program experience and syllabus planning.

Carefully assessing the current curriculum is a crucial part of the early phases of curriculum development. Potential job placements, industry expectations, and student requirements are all taken into consideration when conducting this evaluation. In order to make sure that any new program or modification is informed and pertinent, CCET analyzes the curriculum's strengths and weaknesses.

Students, instructors, and academic specialists from other institutions all actively participate in the curriculum development and review process. Students are asked to provide feedback for every course they take. A prescribed questionnaire created by the institute is used to gather this input. Before the semester ends, the procedure consists of both traditional hard copy submissions and online approaches. The goal of this multifaceted approach is to record a wide variety of student viewpoints and experiences.

Faculty members also participate in giving feedback on the classes they instruct. The curriculum review process is guaranteed to take into account the perspectives of both teachers and students thanks to this all-encompassing approach. Following collection, the input is compiled and given to the institute's curriculum review committee. In evaluating the received input, the curriculum review committee is essential. To discuss the recommendations made by academic experts, faculty, and students, this committee meets on a regular basis, usually at the conclusion of each semester. Fostering an in-depth discussion that produces insightful conclusions and suggestions for curriculum enhancement is the goal. The committee makes sure that any modifications are consistent with the overall goals and structure of the curriculum during these discussions.

The curriculum review committee develops suggestions for modifications after carefully examining and debating the input. These suggestions are then discussed at sessions of the Institutional Quality Assurance Cell (IQAC), which is in charge of managing programs aimed at improving quality. The members of the IQAC examine the suggested modifications and offer additional analysis and recommendations, guaranteeing a comprehensive evaluation.

The required modifications are then incorporated into the curriculum, taking into account the IQAC's recommendations. CCET's educational offerings are kept up to date, relevant, and of the highest calibre thanks to this painstaking process of gathering, analyzing, and implementing feedback. CCET exhibits its dedication to ongoing development and the delivery of education that satisfies modern standards and expectations by involving students, faculty, and academic specialists.

Princ. Aim High, We Prove The Mean!

Using student feedback as a basis for improving and adjusting the current educational framework is highly valued by the institution. In order to collect both quantitative and qualitative information, the students' feedback questionnaire is used twice a year at the conclusion of each term. In-class content, pedagogy, learning resources, opinions on theory and practical courses, and the institute's services are just a few of the topics covered in this questionnaire that explores the students' academic experiences.

Students will have a forum to express their thoughts about the curriculum, instructional strategies, extracurricular activities, and teaching methods thanks to this methodical approach to gathering feedback. The feedback is carefully examined and analyzed before being used as the foundation for making changes. After discussing the feedback with the appropriate departments, the IQAC is presented with workable recommendations for implementation.

The majority of respondents were generally satisfied with the program scheme, which is a noteworthy trend from the survey. The institution's dedication to continuous improvement is demonstrated by the successful results of the scheme's constant improvement based on input. The vast majority of students are interested in the course material and how it is delivered, both theoretically and practically. They say that the variety of courses and the different activities, like workshops and guest lectures that enhance their educational experiences make them happy.

Although a small percentage of student's voice concerns regarding the availability of resources, especially with regard to reading materials and lab equipment/software, most believe that the library's reference materials are adequate to meet their theoretical and practical needs. The availability of e-books and e-resources from the institution also enhances the convenience and accessibility of learning for the students.

Positive comments about the institute's software and equipment are a noteworthy highlight. These resources are essential for establishing a connection between abstract ideas and real-world implementations. The school's commitment to developing students' research skills is evidenced by its investment in a state-of-the-art research lab.

Using a variety of teaching philosophies, the institution's faculty members create captivating learning experiences by utilizing multimedia resources such as PowerPoint presentations, site visits, animations, and real-world examples. These approaches are meant to push pupils and deepen their comprehension. By hiring seasoned professors, the school demonstrates its dedication to providing high-quality instruction and coordinating its curriculum with business needs.

Class Teachers (Mentors) are an important part of the institution's support system because they help struggling students with their needs. Beyond academics, this mentorship program offers social and psychological support. Positive student feedback suggests that mentors successfully enhance students' general

wellbeing. Frequent communication between mentees and mentors, along with parental involvement, builds a comprehensive support system that promotes both student achievement and individual development.

To sum up, the institution's methodical approach to gathering, evaluating, and acting upon student input highlights its dedication to ongoing education. In order to make sure that its educational offerings continue to be effective, relevant, and responsive to the changing needs of students and the academic landscape, the institution works with stakeholders and the IQAC to implement changes based on feedback.

2. Alumni Feedback

Alumni have expressed a great deal of gratitude for the University's curriculum because of its exceptional adaptability and multidisciplinary approach. It is very admirable how the curriculum can be tailored to different fields to meet the needs of each student and guarantee a thorough comprehension of the material. The curriculum notably emphasizes skill development, which is in line with the changing needs of the workplace.

One of the notable strengths of the curriculum is its alignment with competitive examinations such as GATE and NET. This strategic mapping equips students with the necessary knowledge and preparation to excel in both national and international-level exams. Preparatory classes play a crucial role in enabling students to grasp the essential prerequisites for these exams. The incorporation of frequent revision cycles, mock tests, and

expert talks contributes significantly to enhancing students' confidence and enthusiasm, ultimately facilitating better performance.

The curriculum's commitment to professional enhancement activities is noteworthy. This dedication contributes to improved placement opportunities for students and a better understanding of market dynamics. However, there is room for further synergy between industry and academia. Integrating more industry-specific inputs into the curriculum can effectively bridge the gap and equip students with practical insights that align with real-world requirements.

To enhance students' practical skills and early exposure to real-world scenarios, compulsory mini projects should be integrated alongside theoretical subjects from the early stages of academia. This approach nurtures innovation, critical thinking, and application of concepts, preparing students for the challenges of the professional realm.

Given the rapid pace of technological advancements, the curriculum's regular updates with the latest trends, technologies, and industry demands are essential. By introducing new courses, languages, software, and tools, the institution ensures that students remain well-equipped to address contemporary challenges and opportunities.

Incorporating students into the design of innovative projects and research endeavors fosters a culture of active participation and ownership in their educational journey. Such involvement paves the way for enhanced future prospects and a stronger connection between theoretical knowledge and practical application.

The positive feedback on available resources and infrastructure, including the library and supporting services, speaks to the institution's commitment to providing a conducive learning environment. This supportive ecosystem greatly contributes to students' overall academic experience and success.

Beyond academic prowess, the curriculum emphasizes building core competencies and holistic development. The diverse campus life and events cater to sports, culture, and co-curricular interests, offering students a well-rounded educational experience.

In addition to these strengths, the curriculum's inclusion of activities centered around essential life skills, such as sensitivity training, emergency preparedness, disaster management, crisis management, and community learning, further enriches students' learning journey. These elements not only contribute to their personal growth but also nurture responsible citizenship, ensuring that graduates are well-prepared to contribute positively to society.

In conclusion, the institution's curriculum stands as a testament to its commitment to excellence and holistic development. Through its flexible, multidisciplinary approach, alignment with competitive exams, focus on skill development, and integration of industry insights, the curriculum equips students with the tools and knowledge needed to thrive in a dynamic world. By continuously updating and innovating the curriculum, the institution empowers its students to become well-rounded individuals, capable professionals, and responsible members of society.

3. Employers Feedback

Employers express satisfaction with the curriculum's diverse course options, noting their relevance in job preparation and skill enhancement. The prescribed syllabi effectively bridge the academia-industry gap, equipping students with job-ready skills and knowledge. This alignment ensures graduates are well-prepared to meet industry demands and excel in their professional endeavors.

4. Faculty Feedback

The institution's faculty members engage in a constructive practice of conducting bi-semester course coordination meetings. These meetings serve as dedicated platforms for qualitative enhancement across multiple dimensions of education. The faculty collaboratively addresses aspects such as content quality, pedagogical approaches, learning materials, student performance, research endeavors, and extension activities related to both theory and practical courses.

During these gatherings, faculty members openly share their feedback and suggestions concerning the teaching-learning process, research initiatives, and extension activities. This interactive exchange facilitates robust discussions and deliberations. Additionally,

faculty members provide input on the Programme Scheme, Theory courses, and Practical Courses.

The valuable insights garnered during these meetings are channeled towards fostering continuous improvement. Appropriate recommendations stemming from faculty feedback are channelled to the academic council for consideration and eventual implementation. Furthermore, feedback collected during the teaching-learning process is communicated to the University, initiating necessary actions to address any identified areas for enhancement.

2. How do you rate the allocation of the credits and contact hours(L-T-P)to the courses?

- 5-Excellent
- 4-Very Good
- 3-Good
- 2-Average
- 1-Below Average

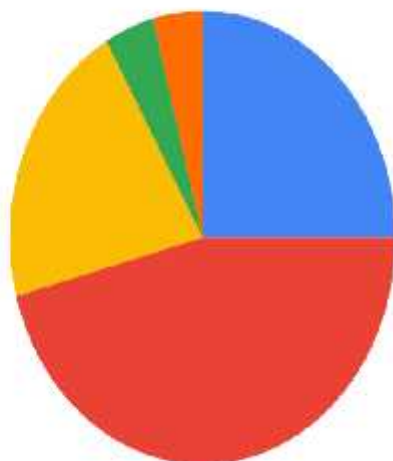

Criterion 1

1.4.2: Feedback Collected, Analyzed and Action Taken

Principal
Christian College of Engg.
& Tech, Kailash Nagar
Industrial Estate, PO,
Bhilai-490 026 (C.G.)

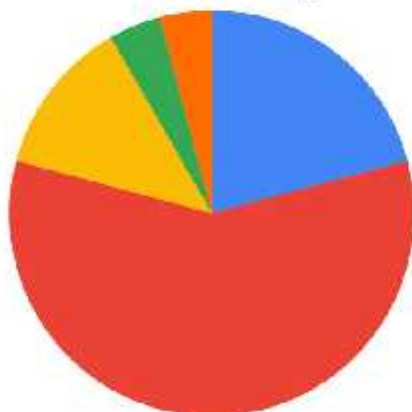

3. How do you rate the offering of the electives in terms of their relevance to the specialization streams and technological advancement

- 5-Excellent
- 4-Very Good
- 3-Good
- 2-Average
- 1-Below Average

4. How do you rate the relevance of the text books and reference books by their international recognition to the courses?

- 5-Excellent
- 4-Very Good
- 3-Good
- 2-Average
- 1-Below Average

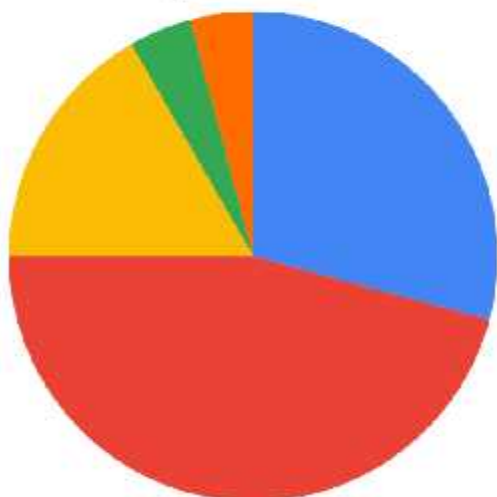

Criterion 1

1.4.2: Feedback Collected, Analyzed and Action Taken

Principal
Christian College of Engg.
& Tech, Kailash Nagar
Industrial Estate, PO,
Bhilai-490 026 (C.G.)

5. Rate the size of syllabus in terms of the load on the student

- 5-Excellent
- 4-Very Good
- 3-Good
- 2-Average
- 1-Below Average

6. Rate the courses in terms of sequence of offering considering whether the preceding courses have been covered.

- 5-Excellent
- 4-Very Good
- 3-Good
- 2-Average
- 1-Below Average

Criterion 1

1.4.2: Feedback Collected, Analyzed and Action Taken

EMPLOYER FEEDBACK (OFFLINE)

Employer Feedback Form

Dear Employer,

Greetings from CCET family

Many graduates of our Institute are already working in your organization. We are thankful to you for having provided them an employment with your prestigious Company/Organization.

In our endeavor to serve you better through our students, we shall very much appreciate and be grateful to you if you can spare some of your valuable time to fill up this feedback form. It will help us to improve the Institute further and give you better employees in future.

Tick the number that best describes your level of satisfaction at each question:

1 - Poor, 2 - Good, 3 - Moderate, 4 - Superior, 5 - Excellent

How satisfied are you with the student/s work performance in each of these areas:	1	2	3	4	5
1. General communication skills				<input checked="" type="checkbox"/>	
2. Capacity to develop practical solutions to work place problems				<input checked="" type="checkbox"/>	
3. Working ability as part of a team					<input checked="" type="checkbox"/>
4. Design, Planning and organization skills				<input checked="" type="checkbox"/>	
5. Self-motivated and capable of taking responsibility				<input checked="" type="checkbox"/>	
6. Open to new ideas and learning new techniques					<input checked="" type="checkbox"/>
7. Familiarity with new technology and equipments					<input checked="" type="checkbox"/>
8. Ability to contribute to the goal of the organization				<input checked="" type="checkbox"/>	
9. Leadership quality in handling the situation			<input checked="" type="checkbox"/>		
10. Relationship with seniors/peers/sübordinates				<input checked="" type="checkbox"/>

FEEDBACK ANALYSIS AND **ACTION TAKEN REPORT** **(2023-24)**

Feedback from stockholders, including students, graduates, teachers, parents, and employers, about curriculum elements and courses is gathered between July 1st and January 31st. After feedback was gathered both offline and online, it was examined, helpful recommendations were taken into account, and the following steps were made.

Student's feedback:

Following suggestions given by students to improve teaching learning process.

- The useful list ought to be expanded.
- More hands-on activities ought to be held.
- Subject-matter expertise needs to be applied more in line with theory.
- With improved lab equipment, the institute ought to concentrate more on practical.
- The emphasis should be on practical knowledge.
- Practical needs to quit giving notes and be enhanced.
- Students' overall development from practical knowledge must be the main focus.
- For a deeper understanding of practical knowledge, the institute ought to arrange plant visits.
- Make room for the pupils. Plan activities that support kids' overall development.

- To improve other talents, knowledge of Arduino and embedded systems must be given.

Students have given rating as follows:

- **Teaching effectiveness:** 75% says very good and excellent.
- **Students experience with faculty:** 75% says it is very good and excellent.
- **Personal attention from teacher:** 78% says very good and excellent.
- **Practical sessions:** 65% says very good and excellent, remaining says well or average.
- **Lab Facility:** 60% says very good and excellent, remaining says well or average.
- **Library facility:** 80% says very good and excellent.
- **Internet facility:** 70% says very good and excellent, remaining says well or average.
- **Sport and extracurricular activities:** 75% says good and very good.

Conclusion:

- 1) It is evident from the analysis above that instruction and learning ought to be more practically focused.
- 2) Soft skill classes should be given more importance.
- 3) The internet infrastructure has to be enhanced.
- 4) Extracurricular activities require greater attention.
- 5) Require room to develop one's self by planning various activities.

Action taken:

An admirable start towards improving the educational experience was taken when the Principal, Heads of Departments (HODs), and Internal Quality Assurance

Cell (IQAC) decided to emphasize practical learning. Students will learn more about their courses if practical classes are extended beyond the university's required experiments. Furthermore, arranging industrial visits will introduce students to practical uses, strengthening the connection between theory and practice. They will stay up to date on developments in the sector through workshops that are enhanced by practical encounters with modern technologies.

In addition, the initiative to invite guest lecturers to conduct seminars and symposiums on technologies outside the curricular will broaden the knowledge horizons of students. Offering annual certificate courses to third- and fourth-year students equips them with specialized skills and makes them industry-ready. At the same time, integrating soft skills courses into the regular curriculum improves their communication and interpersonal skills, which are crucial for career success.

These comprehensive initiatives will not only enrich the learning journey of students but also fully prepare them to face the challenges of the modern world, thereby ensuring their holistic development.

Following Table shows activities organized by the Institution: Through this course practical based knowledge is provided to students of 5th and 7th semester

S. No.	Year	Details of event	Date from--to	Semester	Branch
1	2023-24	For program on Advanced Network information and Automation	21/09/2023 to 22/09/2023	5 th and 7 th	Computer Science Engg
2	2024-2024	WORKSHOP ON RECENT INNOVATION IN HYDROGEN TECHNOLOGY	29th Dec 2023	5 th and 7 th	Mechanical Engg.

Alumni Feedback:

The input from alumni offers important perspectives on the institution's strengths and areas that require improvement. A positive 85% satisfaction rate with the activities of the alumni association demonstrates successful engagement and networking options for graduates. Nevertheless, the 75% satisfaction rate related to training and placement activities points to a necessity for improvement, indicating a need to strengthen support mechanisms and industry relationships.

Even though 70% of graduates believe the current curriculum meets their needs, it's important to acknowledge that it needs to be improved to better meet industry demands. By updating the curriculum on a regular basis and integrating former students and business leaders, the school has the opportunity to close this gap.

A noteworthy accomplishment is also the 80% satisfaction rate with the teaching-learning process. This success could be maintained by supporting educators' ongoing professional development and promoting creative teaching strategies to increase student engagement.

The comments emphasize how crucial it is to keep the alumni association functioning effectively, enhance training and placement opportunities, closely match the curriculum to industry demands, and keep improving teaching strategies. By taking care of these issues, the school can make sure that its graduates and students have the best possible education and are ready for the workforce.

The remarks highlight the importance of maintaining the alumni association's effective operation, improving training and job placement options, aligning the curriculum with industry needs, and continuously refining teaching methods. By addressing these concerns, the institution can ensure that its graduates and students receive the highest quality education and are well-prepared for their careers.

Conclusion:

Based on the insights and remarks provided by our former students, it is evident that their recommendations and aspirations closely align with those of our present students. Furthermore, they emphasize the following points:

- 1) Offering support for multiple programming languages alongside traditional theory classes for all disciplines.
- 2) Encouraging students to engage in field projects instead of solely focusing on home-based application projects.
- 3) The curriculum should be updated to meet the current demands of the industry.
- 4) Internships should be incorporated, and vocational training must be strictly adhered to.

By taking the following steps, the Internal Quality Assurance Cell (IQAC) has demonstrated initiative in incorporating student experiences and alumni input into

the curriculum.

1. Alignment with Student Feedback:

- Action: The institution prudently decides to base its actions on the similarity between the expectations of current students and the recommendations made by alumni. This guarantees that the current student body will gain from the insightful information that alumni have to offer.

2. Cross-Departmental Participation in Certificate Courses:

- Action: Cross-disciplinary learning is improved when certificate courses offered by the Computer Science and Engineering (CSE) department are open to students from any branch. In line with market demands, this develops a wider range of skills, particularly in software and programming languages.

3. Motivation for Field Projects and Industry Internships:

- Action: Promoting field projects and internships among students shows that the emphasis is on using their knowledge in real world situations. Their professional development and comprehension of industry practices will greatly benefit from this practical experience.

4. Incorporating Alumni Recommendations into Syllabus:

-Action: Encouraging members of the University Board of Study to take alumni suggestions into account when designing the curriculum guarantees that it will continue to be pertinent to business demands. The institution's dedication to remaining up to date with industry demands is demonstrated by this proactive approach.

5. Internship Follow-ups and Record-Keeping:

-Action: Accountability is ensured by putting in place a system for monitoring internships and vocational training. Throughout internships, routine follow-ups help students get the most out of their exposure to the industry and preserve the quality of the experience.

By implementing these steps, the university actively engages students in a variety of learning opportunities and responds to the recommendations of the alumni, thereby providing them with a thorough education for their future careers. This all-encompassing strategy improves the educational process

overall and prepares graduates for the demands of the changing labor market.

Employers Feedback:

Employer feedback analysis offers a thorough picture of students' skills and abilities across a range of domains, revealing both their strengths and weaknesses.

Strengths

1. Communication Skills:

- Analysis: Many employers (54 percent) recognized that students had strong communication skills, which are essential for success in the workplace.

- Action: To improve these abilities even more, promote group discussions, presentations, and activities that emphasize communication.

2. Teamwork:

- Analysis: Eighty percent of employers acknowledged the student's strong teamwork skills, demonstrating their capacity to work well in a variety of work settings.

- Action: To further develop and hone teamwork skills, keep encouraging group projects and cooperative activities.

3. Planning and Organizing Skills:

- Analysis: A remarkable 80% of employers rated student's planning and organizing skills as very good, highlighting their ability to manage tasks efficiently.

- Action: Increase the number of project-based learning opportunities to help students develop their organizational skills in real-world situations.

Principle: Acquire Skills, Develop The Man

4. Openness to New Ideas and Techniques:

- Analysis: Employers recognized that 65 percent of students were receptive to new concepts and methods, demonstrating their flexibility and eagerness to learn.
- Action: Through seminars, workshops, and projects that promote original thought and the investigation of novel ideas, cultivate an innovative culture.

5. Technical Knowledge and Technology Usage:

- Analysis: Employers commended students' technical expertise and proficiency with new technologies in a noteworthy 80 percent and 78 percent of cases, respectively.
- Action: As technology advances, make sure students have access to state-of-the-art materials and instruction to sustain their technical competence.

Areas for Improvement:

1. Leadership Qualities:

- Analysis: There is potential for improvement even though 85% of respondents thought that students' leadership abilities were good or average.
- Action: Provide extracurricular activities, mentorship opportunities, and leadership development programs to enable students to assume more important roles.

In summary, the institution has excellent communication, teamwork, technical knowledge, and organizational abilities. Targeted interventions may be necessary to address the leadership area, but maintaining an emphasis on technical excellence and innovation will fully prepare students for the workplace and guarantee that they meet and surpass industry standards.
